

Cesium is a naturally occurring mineral with the atomic number 55 on the periodic table of elements. It is nature's most alkaline mineral. Cesium has been shown to affect the cancer cell two ways. First, Cesium limits the cellular uptake of the nutrient glucose... starving the cancer cell and diminishing fermentation. Second, Cesium raises the cell pH to the range of 8.0 neutralizing the weak lactic acid. A pH range of 8.0 is a deadly environment for the cancer cell.

The information below was designed by trained nutritional experts from the Eniva Corporation. If you have any concerns about the safe use of Cesium, we advise getting evaluated by your doctor to measure Potassium levels while going through this protocol. This chart is based on 2 ounces daily consumption of Cesium. (With a 5 to 1 ratio.... 5 parts potassium, 1 part cesium.)

WAKE UP: Drink 8-12 oz. of water. Take 1 tablespoon Potassium.

EAT BREAKFAST, then: 3 tablespoons Potassium, (You can mix with a strong juice like grape, cran, etc...).
DRINK WATER BEFORE, DURING AND AFTER.

AFTER LUNCH: Drink 1 tablespoon Potassium, wait five minutes, then take **1 tablespoon Cesium** in a few ounces of water or juice. (You can also spray Cesium onto skin. Spray a few squirts near tumors. Ex. On breasts, abdomen, chest, neck, etc..) Continue to sip water.

AT LEAST AN HOUR AFTER LUNCH: 3 tablespoons Potassium. **DRINK WATER BEFORE, DURING, AFTER**

AFTER DINNER: Drink 1 tablespoon Potassium, wait five minutes, then take **1 tablespoon Cesium** in a few ounces of water or juice and spray with Cesium. Drink with water.

BEFORE BED: 1 tablespoon Potassium

- **TAKE FRIDAYS AND SATURDAYS OFF OF CESIUM, CONTINUE AGAIN ON SUNDAY THROUGH MONDAY. (IF YOU TAKE TWO OTHER DAYS OFF, CONTINUE WITH FIVE DAYS OF CESIUM.)**
- **You will need to measure the minerals with PLASTIC measuring spoons. Metal affects the way the liquid minerals work.**

This chart is based on **2 ounces daily** consumption of Cesium. (from above)

WAKE UP	EAT BREAKFAST	RIGHT AFTER LUNCH:	AT LEAST 1 HOUR AFTER LUNCH	AFTER DINNER	BEFORE BED:
1 tablespoon Potassium	3 tablespoons Potassium	1 tablespoon Potassium, wait 5 minutes, then take 1 tablespoon Cesium	3 tablespoons Potassium	1 tablespoon Potassium, wait 5 minutes, then take 1 tablespoon Cesium	1 tablespoon Potassium

This chart is based on **1 ounces daily** consumption of Cesium.

WAKE UP	EAT BREAKFAST	RIGHT AFTER LUNCH:	AT LEAST 1 HOUR AFTER LUNCH	AFTER DINNER	BEFORE BED:
½ tablespoon Potassium	1½ tablespoons Potassium	½ tablespoon Potassium, wait 5 minutes, then take ½ tablespoon Cesium	1½ tablespoons Potassium	½ tablespoon Potassium, wait 5 minutes, then take ½ tablespoon Cesium	½ tablespoon Potassium

Note: Cesium should NEVER be used without supplementing your Potassium levels. 4 to 1 is minimally recommended. 5 to 1 is better.

Our ionic Cesium comes in 32 ounce bottles
